

Health Assessment Consent Form

Before we can undertake a health assessment, we need informed consent from you to be able to proceed. The following lists what permission we require from you and how we will process your data. On the day of your assessment, your Health and Wellbeing Expert will obtain consent from you.

- I agree to my personal details and results being stored on a secure computer system and communicated back to me in a secure manner.
- I agree that any information I provide will, to my knowledge, be as accurate as it can be and I understand that some of the calculated health risks and results will depend on this accuracy.
- I agree to have items like my height and weight measured and recorded, however understand I can decline any tests I do not wish to undertake.
- I agree to a variety of clinical tests being carried out on me such as blood and urine tests. I understand blood tests might involve taking finger prick blood samples or venous draw samples.
- I understand that if urgent follow up is required as a result of one or more of my tests then a healthcare professional from ToHealth will attempt to contact me for a follow up conversation.
- If I have a venous blood sample taken then I understand that my blood samples and relevant information will be sent to a partner accredited laboratory for analysis and results returned to me. I understand these results will be made available to me for 21 days via a secure link from the day of the email being sent.
- If your employer pays for your screening then we will inform your employer of your name, screening location, services provided and attendance date so that ToHealth can correctly invoice for the screening carried out. We do not disclose to your employer any identifiable results or measurements from your own screening unless we are undertaking statutory tests such as fitness to work in an occupational health capacity.
- I understand that anonymised results (aggregated results that cannot identify me as an individual) might be used by ToHealth to provide statistical information to improve their service and product offering.
- I understand I can withdraw my consent at anytime and the health assessment will be aborted.

Additionally, I understand that:

- We may for reasons outside our control be unable to provide reliable results from a blood sample for particular blood tests. We will under these circumstances either offer a partial refund to the value of those tests that we are unable to have confidence in. Alternatively, we may offer to take your blood again. The decision as to which option to offer you is at our discretion but you have the option to refuse to have your blood taken and instead have a refund.
- The data derived from this screening is to be considered preliminary only and does not constitute a diagnosis of any condition.
- The responsibility for initiating a follow up examination upon any concerns following this screening remains with you, the client.

Full details on how ToHealth handle and process your data can be found by looking at the ToHealth privacy notice on the ToHealth website at <https://tohealthltd.co.uk/privacy-policy/>
